# CARRÉ

Simply designed for a trendy ambience, the CARRÉ range with its tall, sharp-angled bowl will be a beautiful asset to your dining area or bar. The sharp-angled bowl gives this range a trendy yet elegant look. The crisp line in the design is a subtle measurement mark to control serving sizes and, as a result, enhance your profit! Celebrating the 20th anniversary of Carré in 2023, we extended the range with two wine glasses, a tumbler, a port wine glass and a coupe. The shape is similar to the former glasses, but by having a tall and thin stem, the design gets an instant uplift!

## SPECIALS BEERS

Royal Leerdam's SPECIALS BEER glasses are carefully designed to complement any beer style. Serving beer in the appropriate glass will accentuate its aroma, flavor and mouthfeel. Also it will influence the amount of head and carbonation. A Pilsner for example needs a tall and rather slender glass which reveals the color and carbonation of the beer. The tulip beer glass with a round and slightly flared shape on the other hand, is designed for Belgian beers. It captures the head and promotes the aroma and flavor of typical Belgian beers. Not only do beer glasses provide a nicer drinking experience, but they also enhance the beer's flavor based on their shape. Therefore, it's crucial to the success of any bar, restaurant or bistro to serve beers in the proper glasses.

For beer tastings, Royal Leerdam offers the AnDer 1.0 beer glass, a co-creation between Royal Leerdam and Dutch beer experts. AnDer's beautiful design goes hand-in-hand with its functionality. The wide tulip-shaped bowl with a narrow top, makes it ideal to optimally judge the flavour, aroma, colour, clarity and foam concentration of different beer types.

# SPECIALS BEERS

The SPECIALS BEERS range offers a wide variety of beer glasses. Each glass shape is designed to enhance the flavour of beer. # HANDLING GUIDE

## Why glassware breaks

Glassware is one of the most important tools used in the hospitality industry. It is also one of the hardest materials around, yet under certain conditions it can also be fragile. The number one reason for glass breakage is improper handling. This guide presents you and your staff with insights into how to minimize breakage through proper handling of your glassware. By applying these tips you can save 20-30% on glassware costs.

## Thermal shock

Glass holds temperature, and a rapid change in temperature can cause enough stress to result in breakage. The main moments when thermal shock loss can occur are in the dishwashing cycle and when preparing drinks. To minimize loss always allow glasses to reach room temperature before and after they are washed and pre heat glasses that will hold hot beverages.

## Mechanical shock

Mechanical shock in glassware is the direct result of contact with another object, such as a spoon, a beer tap, another glass, or a piece of china. This kind of contact can cause a minute abrasion, invisible to the eye, but a source of weakness in the glass, making it more susceptible to breakage from impact or thermal shock.

## DRINK PREPARATION

Use plastic scoops  
to pour ice.

Never let a glass touch  
the tap or dispenser.

Re-stock glassware to be  
prepared for rush periods.

## SERVICE

Never carry glasses  
in bouquets.

Bottles should not touch  
glasses when pouring.

Remove glasses that are no  
longer in use from the table.

Glasses should not touch  
each other on trays.

## STORAGE

Store glasses in correct  
compartmentalized racks or boxes.

Glasses in overhead racks  
should not touch.

Allow glasses time to cool  
before handling them.

## WASHING & CLEANING

Wash before  
first use.

Check the  
temperature of the  
dishwasher rinsing  
and drying cycles.

Remove damaged or abraded  
glassware from service  
(damaged glass may break in  
the dishwasher).

Use the correct rack  
for the glasses you are  
washing.

Hold stemware by the  
stem (not foot) when  
polishing.

Remove ice from glasses  
as quickly as possible (to  
avoid thermal shock).

Check the temperature  
of the water regularly.

Sort items in bus bins  
and trays (do not over-  
load them).

Never put cutlery or other  
objects inside glasses.
